Bible Thought For Today

MAN'S BIRTHRIGHT-Thou madest him to have dominion over the works of thy hands; thou hast put all things under his feet .- Psalms 8:6.

TO TAKE THE PLACE OF THE TROLLEY

Over on Staten Island they have the trackless trolley. On this side of the sound we will soon have the trolleyless track. The Staten Island line is being run with considerable success, but there is not the traffic problem to be solved. A trackless trolley operates on the main highway the same as a bus, only its motive power comes from a central power house by means of the overhead wire and trolley pole. It is plain that such a system of transportation would never do for the route between this city and Keyport. Traffic is the one big problem here.

Motor buses with flanged wheels to run on the track that the Jersey Central Traction Company is to abandon, furnish the real solution for transportation between this city and the Monmouth county towns, as Mayor Wilson suggests. This would give the buses their own right of way and they could operate regardless of the traffic congestion on the main highway.

Judging from the comment by officials in the towns affected, buses are favored to take the place of the trolley. In fact, there is nothing else to suggest. But this is only adding to an already aggravated situation. Highway development along the main travelled roads has not kept pace with the increase in traffic. Buses and trucks even when hugging the edge of the pavement take up more than half of the roads. But they usually run down the middle and are very slow about pulling over to let automobiles coming up from behind get by. Cars line up and congestion and confusion results. Add to this the nuisance of a bus stopping suddenly right in the path of the vehicles behind it and the condition that "foreign exchange is not nearly so complicated as is generally sup-

becomes dangerous.

With bus lines operating between this city and Keyport the problem will soon be one for the State Highway Commission. One so complicated as is generally supposed." So many people have said this that the query arises as to how many people there are left who believe the subject is complicated. The little who have said this that the query arises as to how many people there are left who believe the subject is complicated. The little who have said the problem will soon be one for the State Highway Commission. One plution would be the widening of the highway and convenient urnouts for the buses where they could pull out of the way when topping for passengers.

FANTASTIC FINANCE

The anarchic state of German finance is increasing with such damentals become obscured past to Germans. They go to their banks recognition. rapidity that the general public is totally unable to follow the fanrapidity that the general public is totally unable to follow the fantastic fluctuation of the mark, not from day to day, but from hour
to hour. In spite of the fact that the bread supply, now again

The fundamentals of foreign exchange are these: The people of one country sell goods to the people of amount of dollars. In return the country sell goods to the people of the sark for a certain amount of dollars. In return the country sell goods to the first also there are these: The people of one country sell goods to the first also there are the people of the sark for a certain amount of dollars. In return the country sell goods to the first also there are the people of the sark for a certain amount of dollars. In return the country sell goods to the first also there are the people of the sark for a certain amount of dollars. In return the country sell goods to the people of the sark for a certain amount of dollars. In return the country sell goods to the people of the sark for a certain change are these: The people of the sark for the sark for the people of the sark for the sark for the sark for the people of the sark for the sark for the sark for the people of the sark for the sark for the rationed, as in war time, by the issue of bread cards to the poorer The actual materials and commodi- man who wants to pay money in this classes, is heavily subsidized by the government, the price has just normal, ideal trade, countries trade dollars. He must pay a great number of butter for shoes, for example, in ber of marks to get a few dollars been doubled in 24 hours, the four-pound loaf now costing 10,000 even volume.

workers of Berlin demand 25,000 marks an hour, or 1,100,000 commodities exchanged do not balmarks for a working week of 44 hours. But even at this rate the wage in American money is only equivalent to 10 cents an hour. As bread is 10 cents a loaf and meat and butter 50,000 marks a pound, even such seemingly colossal wages do not go far in pro- must pay in pounds sterling. The kronen-for what people will pay viding for a family. Expressed in American money, they represent less than \$5 a week.

The vertiginous downward course of the mark naturally upsets all budgetary combinations made by the minister of finance. tuates. The taxation scheme introduced five months ago now only brings in one-fiftieth of the estimated revenue. The deflicit of forty-ninefiftieths is met by pouring out a constant stream of treasury bills. These have been issued to the extent of 7,661,659,000,000 paper

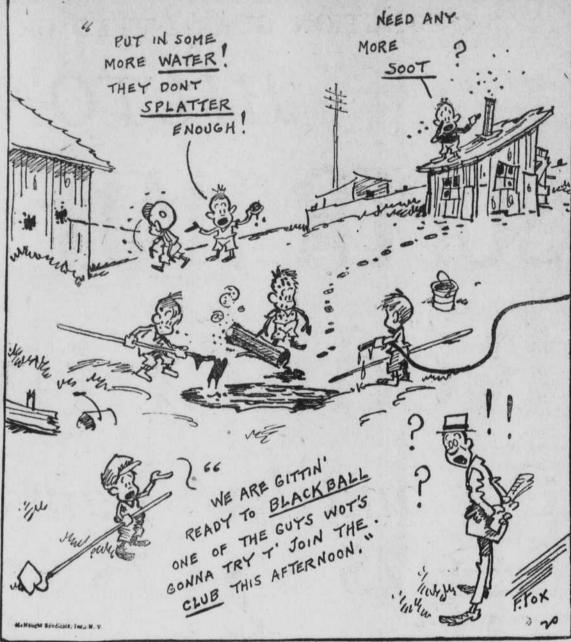

The strain upon the banks of the handling of this extraordinary mass of inflated paper money is very great. The Deutsche \$5 for one pound. Bank has had to engage 26,000 employes to deal with it. To still further complicate matters the government keeps pouring forth an endless stream of laws, ordinances and regulations. More than 170 have been issued in the last week or two. An army of employes \$3 in American money. The pound a paper dollar is good for a gold has returned nearly to par at this dollar. This adds to the difference is required to do nothing else but study this mass of regulations and attempt to apply them to current business.

ALL WORK GENTEEL

The story told of a young man, a bank clerk on a salary of \$2,000 a year, who refused another position paying \$500 more because he would in that case be a shipping clerk and the bank job is "more genteel," is representative of more than one individual. While most young men, at least all who will ever amount to anything, would take the job that pays the most money, other things being equal, there is a class, possibly, which considers the gentility of the job compensates for the lack of pay. It is conceivable that one might decline a position offering more money because the opportunities contained were less than in the one held, but in that use the decision would not be based on gentility.

All work in genteel that is legitimate and the job of a shipping clerk is as honorable as that of a bank clerk. Both honor the man who does good work and neither can honor the man who thinks one is more genteel than the other. The man who works with his hands and gives an honest day's work is not less genteel than another who wears a white collar and whose employment does not soil his hands. It's the man and not the job on which gentility

THE REFEREE (By Albert Apple)

Movies

Eighteen thousand movie theatres in the United States with an attendance of 50 million ticket-buyers where the according to a trade estimated to the control of the a week, according to a trade esti-mate. Which means the average

mate. Which means the average person goes to the movies about once every two weeks.

Edison was right when he said: "Whoever controls the motion pictura industry controls the most powerful medium of influence over the people."

The chronic movie-goer is an emational drunkard. John Baleycorn after all, had in his favor that he was more of a physical and mental stimulant than an excitant of the

stimulant than an excitant of the

Censors

New York censors eliminated certain parts of the movie, "Good Riddance." The producers "went to law," and the court of appeals overrides the censors. The film will so into circulation in New York state about as it was before the censors cut it.

In this particular film the censors objection was that some of the epi-sodes portrayed cruelty to animals which might incite others to cruelty. It seems to be all right to portray cruelty to children in the pictures, which is a puzzling contradiction.

Prices
Retail prices in Germany as the mark continues going to pieces, rise a third in one week. Cost of living there now is over 11,000 times high-er than it was when the war started

in 1914.

The mark apparently was purposely inflated to throw sand in the eyes of indemnity collectors. The Germans dug a pit for their neigh-bors and fell in it themselves. The boomerang usually returns to its source, especially when hurled by an expert, with power.

expert, with power.

Autos

Four auto companies now have produced more than a million cars apiece since they started business. Willys-Overland is the latest. Bulck and Chevrolet passed the million mark early this year. Dodge soon will be the fifth to reach the mark. Ford hit the million goal several years ago. He's getting along to 8,000,000 cars produced.

These figures don't mean much unless you recall the old days when

These ngures don't mean much unless you recall the old days when the "horseless carriage" struck most people as a fad or at best an innovation limited in its power of growth. It's dangerous to condemn nything new—or predict its future.
Statistics

Something new under the sun-a business doctor who condemns his Thompson, railroad statistician, says superfluous statistics are adding 100 nillion dollars a year to our nation's ransportation bill.

transportation bill.

Possibly an exaggeration, but in principle he is right. And it's true of all industries, semi-demented concerning statistics which few read and fewer understand.

Since 1895 railroad clerks have increased 441 reason, while passen.

creased 441 per cent, while passengers increased only 147 per cent and freight tonnage only 231 per cent. System is fulle except when it eliminates work and cuts out of pro-

Books
The Bible, still the best seller, has been translated into 770 languages and dailects. Next book in line is "Pilgrims' Progress," translated into 107 languages and dialects. Any one will admit there must be

profound reason why these two works lead in allurement. Have you read both of them thoroughly? No education is complete without this thorough reading.

DOOR LOCKED?

Did you ever lock the house door, climb into your auto for a motor trip, then get out and go back to make sure the door was locked? Did you have to try the knob not once but several times before convinced that the door wouldn't swing open at the first touch of a thief who might happen along?

Did you ever get out of bed and "make sure" the lights were turned off in a certain room, or in the cellar, even though you recalled very distinctly having turned them out?

Did you ever go over the house carefully before retiring or leaving the premises, to make sure that nothing had been forgotten in the way of smouldering cigarets that might start a fire? Did you ever . . . O what's the use? All of us are subject to these occasional losses of confidence in our memory and judgment.

Cases such as these are apt to make us wonder occasionally if we are "all there" mentally. An insanity specialist, interrogated, might not be very comforting in his answers. Old Dr. Johnson, out for a stroll and passing a picket

fence, always had to hit every picket with his cane as he passed. Sometimes he believed that he had missed a certain picket, then he'd walk back a block or two and hit the offending piece of lumber an especially hard and comforting Think of Dr. Johnson, next time you have the impulse to

step on every crack of a sidewalk-or avoid stepping on them. These queer brain short circuits or throw-backs are not so much matters of sanity as of nerves. They belong in the same class as nervous drumming with fingertips, tapping of shoes to keep time to music, counting stairs as we climb, making freakish moron pencil designs in absent-minded moments while talking over the phone or waiting for a number. Such brain lapses, unless curbed, can become annoying

habits. Fundamentally they are nervous disturbances. And they demonstrate that good memory, confidence in one's judgment and acts, and the alertness that is the opposite of absent-mindedness-all these are in varying degree a condition of nerves, rather than of education or determination or the hanging of "pep" mottoes over the desk.

Safeguard your nerves, for only when they are functioning harmoniously does your brain do its best work. You've observed how difficult it is to concentrate and reason when nervously restless.

country.
